🎓 EDUCATION

09/2022 – present   **BSc (Hons) Computing - Software Development**   Athens, Greece
Aegean College (University of Essex) ⧉

After a summer full of searching and decision making, I decided to start studying at said college since it was offering courses and most of all, a degree I was very passionate about. Since starting, I have learned to:

- create more in-depth Java Applications
- create basic databases using SQL into MS Access
- managing projects into MS Project and LibreOffice
- work in groups using Agile Methology
- analyze and design systems
- create data-flow diagrams (DRD)
- create entity-relationship diagrams (ERD)
- create basic websites using HTML/CSS

10/2019 – 06/2022   **Electrical and Computer Engineering**   Patras, Greece
University of Peloponnese ⧉

Studied Electrical and Computer Engineering for three years until I realized that Electrical Engineering(primary focus of said University) was not something I was passionate about. While studying there I learned the basics of Python, C++ and Java. I am used to using PyCharm for Python, Dev-C++ for C++ and IntelliJ IDEA for Java but prefer using Visual Studio Code overall.

📚 COURSES

03/2023 – 04/2023   **CS50's Introduction to Computer Science** ⧉   Online
HarvardX
